

```
function iFrameHeight() { var h = 0; if ( !document.all ) { h =  
document.getElementById('blockrandom').contentDocument.height;  
document.getElementById('blockrandom').style.height = h + 60 + 'px'; } else if( document.all ) {  
h = document.frames('blockrandom').document.body.scrollHeight;  
document.all.blockrandom.style.height = h + 20 + 'px'; } } This option will not work correctly.  
Unfortunately, your browser does not support inline frames.
```
